

Prime9 XT

Standard & High Capacity

Extra Tough Pleated Air Filters

FEATURES

- MERV 9A efficiency
- Low pressure drop
- High dust holding capacity
- Extended surface
- Heavy duty wire support
- Heavy duty moisture resistant frame
- Available in 1, 2, & 4" depths
- Max operating temp: 180°F

Prime9 XT is up for the demands of the toughest applications

The unique design of the Prime9 XT delivers maximum performance at a low energy consumption

PRIME9 XT & PRIME9HC XT CONSTRUCTION & APPLICATIONS

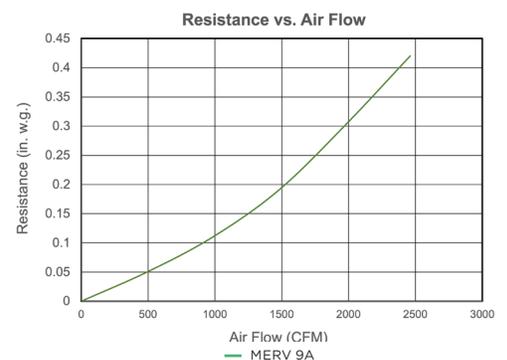

The Prime9 XT filter is engineered for demanding industrial applications, featuring a robust die-cut frame and heavy-duty wire backing for exceptional durability. It's available in standard and high-capacity versions (Prime9HC XT) in one, two, and four-inch depths.

Testing shows the Prime9 XT has a long service life and high dust holding capacity (DHC), thanks to its specially designed fibers that increase surface area for better particulate capture compared to standard fibers.

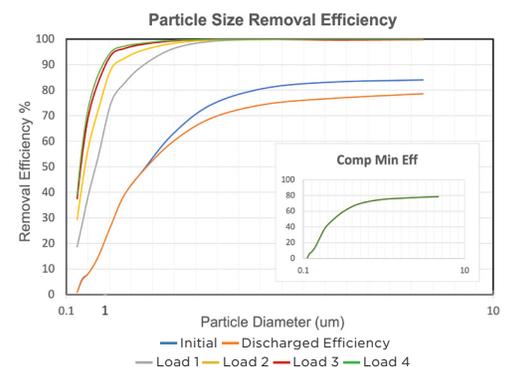

The heavy-duty galvanized steel backing enhances rigidity and supports the media, making it 40% stronger than standard pleated filters. It can withstand 7 in. w.g. of pressure drop with minimal deflection, ensuring maximum efficiency with low resistance (0.30 in. w.g. @ 2,000 CFM). The Prime9 XT is rated MERV 9A and offers an ultra-high DHC for extended service life.

- Notes:
- * These sizes utilize the new 28pt die-cut frame, currently all other sizes utilize the standard prime die-cut frame
 - Recommended final resistance = 1.0 in. w.g.
 - 1 in. depth is rated at 300 FPM
 - 2 & 4 in. depths are rated at 500 FPM
- Performance data is based on ASHRAE Test Standards 52.2

MANN+HUMMEL is committed to continual product development – all descriptions, specifications and performance data are subject to change without notice. MANN+HUMMEL products are manufactured to exacting criteria – there can be a ±5% variance in filter performance.
